Education

- 2026-Present **Istanbul Technical University – Astronautical Engineering** | Expected Graduation: 2028
- 2025-2026 **Erciyes University – Aeronautical Engineering**
GPA: 3.41 / 4.00
Relevant Coursework: Finite Element Analysis (FEA), Aerospace Structures, Aerodynamics, Computational Fluid Dynamics (CFD).
- 2019-2022 **Istanbul Technical University – Astronautical Engineering**
GPA: 3.12 / 4.00
Entrepreneurship: Selected for ITU Seed (İTÜ Çekirdek) Incubation Program (Top 5 University Incubator Globally) for the "Gezgin" startup project.

Experience

- 2019-2022 **Gezgin (High Tech Company)**
- Co-founded a high-tech startup incubated at ITU Seed (ranked top 5 globally).
 - Built the initial team, defining technical roles and recruiting the right people for the project.
 - Coordinated the technical team and managed product development activities.
- 2026-Present **Momentum Rocket Team (TEKNOFEST 2026 A2 Finalist – BUMIN V1)**
Mentor
- Providing technical guidance and mentorship to the engineering team on rocket mechanics, structural design, FEA and CFD analysis and aerodynamics.
- 2025-2026 **Mechanical Team**
- Designed the mechanical structure of a 2.8 m composite launch vehicle for the TEKNOFEST A2 Category.
 - Conducted structural and aerodynamic analysis in ANSYS for design optimization and mandatory technical report submissions (ÖTR, KTR, AHR).
 - Manufactured and assembled all internal mechanical components, successfully integrating them with the composite body tubes.

- Projects** **SR-71 Supersonic Inlet Analysis:** Conducted CFD simulations in ANSYS Fluent to analyze critical "shock-on-lip" aerodynamic conditions, utilizing MATLAB to pre-calculate theoretical oblique shock angles for model validation.
- Meshless.ai (Startup Initiative):** Conceptualized an AI-based CFD surrogate model, focusing on establishing a robust data pipeline and generating 5,500+ automated CFD simulations to train predictive algorithms.

- Skills** CAD/CAE: CATIA, SolidWorks, Siemens NX, ANSYS Mechanical, ANSYS Fluent.
Computation & Simulation: MATLAB, Simulink.
Programming: Python, C.

- Languages** Turkish: Native.
English: Professional Working Proficiency.
German: Elementary (A2).

- Communities** Co-founder at Aveonj (Technical Blog) | Former Technical Writer at AESTRO Magazine | Former Active Member at ITU UUMK
